

WEB ACCESS TO DIGITAL COMMENTS

KivaNet and other online resources: Following submittal of plan review applications, the status of the review can be monitored online along with accessing the review comments as they are being drafted. The City of Kansas City launched this service in 1999, through the Internet using a software called KivaNet. To access KivaNet simply click on the following link

<http://kivaweb.kcmo.org/kivanet/2/index.cfm>

After LDD Plan Review has completed its review, the LDD Plan Reviewer will notify the applicant, using the applicant's preferred contact method, which they identified on their LDD Application Form Information Bulletin 159 Part B in section number 2.

Applicants commonly ask to be e-mailed the review comments and disposition. This method will typically result in an e-mail with a direct link to the Kiva Permit Record that documented the submittal and its review and will include a direct link to the KivaNet Permit Summary page, Review Activity Summary, and Review Activity Notes or comments.

For general information navigational instructions on how to use of KivaNet to find information about the status of the reviews associate with your project please review the following:
